Earn a possible internship!!

For the most ambitious one we would like to propose taking part in our Machine Learning Challenge:
Everyone participating in the hackathon could register to SashiDo 45-day free trial and freely create a project with ML & SashiDo
The participants must create a short overview of the project, the tech they've used an and post in on https://dev.to/ and then submit the link to us at hello@sashido.io for review
After the hackathon, our team selects the 3 most interesting projects
We create a short blog post about the top projects and award them with a special prize
Additionally, the top posts will get re-shared through our social media channels to reach a greater audience
